

PRESS RELEASE

Optronic Laboratories instrumentation used in Arizona State University's Advanced Photovoltaics Center

Arizona State University (ASU) recently established the Advanced Photovoltaics Center (ASU-APC). The ASU-APC will focus on the fundamental scientific issues related to photovoltaics, as well as the development of engineering technologies and processing approaches that will help to enable low-cost fabrication of efficient solar cells. The Center is equipped with state-of-the-art technology including precision instrumentation donated in part from Optronic Laboratories and other leaders in the field of photovoltaic and detector research. This synergy between the ASU-APC

and industry and research laboratories will position the Center in the forefront in the national and global acceleration of the development of efficient and low-cost solar cells.
